25X1 5. [] Elder called and indicated OSA had not been able to assist materially in preparing unclassified material for Senator Pastore; therefore, Elder was going to so advise John Conway. This would appear to be pretty much of a dead issue anyway since Pastore has made two major speeches on the floor within the last few days. ✓

25X1 6. [] Met again with Sam Archibald, of the House Subcommittee staff, to discuss our proposed reply to the Subcommittee's questionnaire on public information and congressional information functions. Archibald has reviewed our letter and made one suggestion with regard to the congressional information part of the questionnaire. I told Archibald we would give this some thought and be in touch with him.

25X1 7. [] William Darden called saying he had spoken to Senator Russell about meeting with the Director and Russell had suggested tomorrow morning. Upon learning that the Director would be out of town in the morning, Darden checked further with Russell and it was determined to let it go until after the voting in the Senate early next week. We will be in further touch with Darden and Russell.
